

A UMAP plot showing the relationship between UMAP_1 (x-axis) and UMAP_2 (y-axis). The plot displays numerous clusters of cells, each colored according to its 'barcode_count' value. The legend indicates that the colors represent barcode counts: 0 (dark blue), 1 (green), 2 (yellow), ≥ 3 (red), and NA (grey). The clusters are distributed across the plot, with some showing clear separation and others overlapping. The x-axis ranges from approximately -7 to 7, and the y-axis ranges from approximately -7 to 7.
